### **Personal Profile**

Conscientious and motivated individual looking for a new challenge with experience in IT support for both clients and staff, the A/V industry, Customer Service and Office Admin. Presently working as an experienced IT Support Technician; Excellent communication skills combined with a fierce desire to learn and the ability to work to a deadline in an organised and concise manner with a flair for prioritisation and efficiency; whilst at the same time viewing tasks from a unique creative angle. Experience with developing A/V solutions on the Raspberry Pi platform. I am currently also undertaking various professional IT certifications beginning with CompTIA A+, Networking+ and Linux+ with a view to specialising in network administration for both Windows and Linux systems, this is being done part time over the next 12 months ensuring that it doesn't interfere with employment.

- Excellent interpersonal and Customer Service skills
- Experienced A/V Technician
- Exceptional Problem Solving Skills
- Both practically minded and creatively experienced

### **Relevant Skills Profile**

#### *Current work experience*

Having been employed on the service desk for the past ten months I have been responsible for supporting SSE's user base working in a first line support role handling password resets, server clear downs and more. The role is intensely customer service focused with a target time of five minutes per call this has allowed me to work very efficiently whilst maintaining a consistently high initial fix rate. On top of troubleshooting more technical issues when required..

### *Previous Work Experience*

I was the company's first line IT support for both customers and staff; having experience with both Windows, Linux and OSX systems consisting of remote support, basic server maintenance and general hardware maintenance and repair.. Alongside this I am also a fully trained Audio Visual/Sound Technician with eight years experience whilst working for MJ Visual Systems.

### *Retail experience/Customer service*

My previous role working for One Stop involved the following duties: Operation of tills and handling deliveries along with stock taking; product rotation and stock disposal. Both the public and staff have remarked on my customer service skills judging me to be helpful and polite.

## **Education / Qualifications**

### *The Learning People (Professional Certifications)*

2019/2020 CompTIA A+, Network+, Server+, Linux+ (Ongoing)

### *University of Brighton*

2015 "Certificate of Higher Education in English and History"
